Patent Pending

### **DESCRIPTION**

A portable, self-contained and watertight bin affixed with ramps that controls, captures and contains caustic concrete wastewater and washout material.

### **PURPOSE & OBJECTIVE**

Allows trade personnel to easily washout concrete trucks, pumps and other equipment associated with cement on site and allows easy off site recycling of the same concrete materials and wastewater.

### **APPLICATION**

Construction projects where concrete, stucco, mortar, grout and cement are used as a construction material or where cementitious wastewater is created.

### **MAINTENANCE**

Inspect and clean out when  $\frac{3}{4}$  full, not allowing the container to overflow.

Inspect wastewater level and request a vacuum if needed.

Inspect subcontractors to ensure that proper housekeeping measures are employed when washing out equipment.

### **SPECIFICATIONS**

The container must be portable and temporary, watertight, equipped with ramps and have a holding capacity to accept washout from approximately 350 yards of poured concrete. A vacuum service must accompany washout container and be used by site superintendent as needed. The washwater must be disposed of or treated and recycled in an environmentally safe manner and in accordance with federal, state or local regulatory guidelines.

### **TARGETED POLLUTANTS**

Caustic wastewater (high pH level near 12 units)

Suspended solids

Assorted Metals; Chromium, Nickel, Sulfate, Potassium, Magnesium and Calcium Compounds
